## Medically Underserved Area/Population (MUA/P) Data Elements

### Area Health Education Center Key

<b>Definition:</b>	The Area Health Education Center (AHEC) code is used to uniquely identify an AHEC. An AHEC) is an independent, non-profit organization which links the academic resources of university health care centers with community-based health service delivery systems in medically underserved areas. Primarily funded by cooperative agreements awarded by the Bureau of Health Professions/HRSA under Section 781 of the Public Health Service Act, the AHEC determines the manpower and resource needs of scarcity areas, and coordinate the activities of health profession students who are provided by cooperating medical and osteopathic schools and universities. (These students serve 10% of their clinical training at AHEC sites in underserved areas, thereby redistributing health personnel to areas of need and increasing the services provided to the community.) The individual activities and programs administered by the regional AHEC projects are determined by the needs and problems of the localities they serve.
<b>Business Rules:</b>	The Area Health Education Centers (AHEC) code is four digits; the first two digits are the FIPS State Code, the second two digits indicate the number of the center within the state.

## Medically Underserved Area/Population (MUA/P) Data Elements

### Index of Medical Underservice Score

<b>Definition:</b>	The Index of Medical Underservice (IMU) score. The lowest score (highest need) is 0; the highest score (lowest need) is 100. In order to qualify for designation, the IMU score must be less than or equal to 62.0, except for a GOV designation, which does not receive an IMU score.
<b>Business Rules:</b>	<p>The IMU scale is from 0 to 100, where 0 represents completely underserved and 100 represents best served or least underserved. Under the established criteria, each service area found to have an IMU of 62.0 or less qualifies for designation as an MUA.</p> <p>The IMU involves four variables - ratio of primary medical care physicians per 1,000 population, infant mortality rate, percentage of the population with incomes below the poverty level, and percentage of the population age 65 or over. The value of each of these variables for the service area is converted to a weighted value, according to established criteria. The four values are summed to obtain the area's IMU score.</p>
<b>Formula:</b>	None.
<b>Restrictions:</b>	Public use.

## Medically Underserved Area/Population (MUA/P) Data Elements

### Land Area Year 1990

<b>Definition:</b>	1990 Land Area data are from the "County and City Data Book," 1994, CD-ROM, a statistical abstract supplement published by the Bureau of the Census, U.S. Department of Commerce. Land area measurements are shown to the nearest square mile and include dry land and land temporarily or partially covered by water. Land area was calculated from the specific set of boundaries recorded for the counties in the Census Bureau's geographic data base. The accuracy of any area measurement figure is limited by the inaccuracy inherent in (1) the location and shape of the various boundary features in the data base, and (2) rounding affecting the last digit in all operations that compute and/or sum the area.
<b>Business Rules:</b>	Although land area is a historic field, it has been broken out for Alaska boroughs and census areas, Virginia independent cities, and the U.S. territories of Guam, Puerto Rico, and the Virgin Islands in order to permit calculating population densities.

## Medically Underserved Area/Population (MUA/P) Data Elements

### Region Code

<b>Definition:</b>	The Region Code is the 2 numeric character code (leading zero) used to denote in which of the 10 HHS Regions a grantee primary mailing address exists. The Region Code is also represented by a roman numeral in the Region_Roman_Numeral field of the COUNTY_DIM table. The HRSA Geospatial Data Warehouse determined the Region based on the U.S. state or U.S. territory that contained the primary mailing address for a grantee organization.
<b>Business Rules:</b>	<p>The Region Code is 2 numeric characters with a leading 0. All grantee organizations that have an identified state for their primary mailing address will be assigned a Region Code.</p> <p>The valid Region Codes are:</p> <ul style="list-style-type: none"><li>01</li><li>02</li><li>03</li><li>04</li><li>05</li><li>06</li><li>07</li><li>08</li><li>09</li><li>10</li></ul>
<b>Formula:</b>	HRSA DW.COUNTY_DIM.Region_Cd

### Region Name

<b>Definition:</b>	<p>The Region Name is the text "Region " concatenated with the Roman Numeral representation of the Region Number that is associated with the record in the COUNTY_DIM table. This is used in reporting to denote in which of the 10 HRSA Regions a grantee primary mailing address exists. The HRSA Geospatial Data Warehouse determined the Region based on the U.S. state or U.S. territory that was contained in the primary mailing address for a grantee organization.</p> <p>This data element is a textual string denoting a formal name for the DHHS Region, and is used for reporting purposes.</p>
<b>Business Rules:</b>	<p>The Region Name is a text string comprising the text "Region " and the Roman Numeral representation of the Region Number. All grantee organizations that have an identified state for their primary mailing address will be assigned a Region Name.</p> <p>The valid values are:</p> <ul style="list-style-type: none"><li>Region I</li><li>Region II</li><li>Region III</li><li>Region IV</li><li>Region V</li><li>Region VI</li><li>Region VII</li><li>Region VIII</li><li>Region IX</li><li>Region X</li></ul>

### Region Roman Code

<b>Definition:</b>	The Region Roman Code is the up to 4 characters used to denote in which of the 10 HHS Regions a grantee primary mailing address exists. The Region Roman Code uses Roman numerals to depict the Region number. The HRSA Geospatial Data Warehouse determined the Region based on the U.S. state or U.S. territory that contained the primary mailing address for a grantee.
<b>Business Rules:</b>	<p>The Region Roman Code is the Roman Numeral that identifies the HRSA Region with a text string that is up to 4 characters long. All grantee organizations that have an identified state for their primary mailing address will be assigned a Region Code.</p> <p>The valid values for Region Roman Codes are:</p> <ul style="list-style-type: none"><li>I : 1</li><li>II : 2</li><li>III : 3</li><li>IV : 4</li><li>V : 5</li><li>VI : 6</li><li>VII : 7</li><li>VIII : 8</li><li>IX : 9</li><li>X : 10</li></ul>

## Medically Underserved Area/Population (MUA/P) Data Elements

### Rural/Urban Continuum Code

<b>Definition:</b>	The Rural/Urban Continuum Codes are from "Rural-Urban Continuum Codes for Metro and Nonmetro Counties," Department of Agriculture. The codes form a classification scheme that distinguishes metropolitan counties by size and non-metropolitan counties by degree of urbanization or proximity to metropolitan areas. All U.S. counties and county equivalents are grouped according to the official metropolitan status announced by the Office of Management and Budget (OMB) in June 1993, when the current population and commuting criteria were first applied to results of the 1990 Census of Population.
<b>Business Rules:</b>	<p>The valid values are:</p> <p>Code Metropolitan Counties (00-03)</p> <ul style="list-style-type: none"><li>00 : Central counties of metropolitan areas of 1 million population or more</li><li>01 : Fringe counties of metropolitan areas of 1 million population or more</li><li>02 : Counties in metropolitan areas of 250,000 - 1,000,000 population</li><li>03 : Counties in metropolitan areas of less than 250,000 population</li></ul> <p>Non-Metropolitan Counties (04-09)</p> <ul style="list-style-type: none"><li>04 : Urban population of 20,000 or more, adjacent to a metropolitan area</li><li>05 : Urban population of 20,000 or more, not adjacent to a metropolitan area</li><li>06 : Urban population of 2,500-19,999, adjacent to a metropolitan area</li><li>07 : Urban population of 2,500-19,999, not adjacent to a metropolitan area</li><li>08 : Completely rural (no places with a population of 2,500 or more) adjacent to a metropolitan area</li><li>09 : Completely rural (no places with a population of 2,500 or more) not adjacent to a metropolitan area</li></ul> <p>Missing Value (99)</p> <ul style="list-style-type: none"><li>99 : Missing Value</li></ul>

### Service Area Name

<b>Definition:</b>	The data element that denotes a name assigned to the Medically Underserved Area/Population (MUA/P). It identifies the Service Area as a unit (as opposed to the MUA/P ID number and/or geographic identifier(s)). For MUA/P's designated on or after June, 2001, this entry is mandatory. For older data, it was optional.
<b>Business Rules:</b>	---
<b>Formula:</b>	None.
<b>Restrictions:</b>	Public use.

### SSA Benefit State County Code

<b>Definition:</b>	The Social Security Administration's (SSA) Office of Research, Evaluation and Statistics (ORES) Beneficiary State and County Codes are used for beneficiary record coding, including the Supplemental Security Income (SSI) program. The code consists of a two-byte state and three-byte county code.
<b>Business Rules:</b>	<p>Notes:</p> <ul style="list-style-type: none"><li>* The SSA code system provides a "Statewide" code designation (XX999) for all states. On the Alaska statewide record, it is assigned this code (02999). Otherwise, the "Statewide" codes are not carried.</li><li>* There are two SSA beneficiary codes used to identify Los Angeles County, California (05200 and 05210). However, since FIPS has only one code for Los Angeles, only 05200 is assigned to this county.</li><li>* Data for Park County, Montana (30067) do not include Yellowstone National Park (30113).</li></ul>

### State Abbreviation

<b>Synonyms:</b>	State Abbreviation State Code State_Cd
<b>Definition:</b>	The State Abbreviation is the U.S. Postal Service 2 character abbreviation that identifies the U.S. state or U.S. territory.
<b>Business Rules:</b>	The State Abbreviation must be the 2 character U.S. Postal Service abbreviation for the U.S. state or U.S. territory. The 2 character values are always capitalized. In the DWProviderGeo this element is named State_Cd.
<b>Formula:</b>	HRSA DW.STATE_LKP.State_Abbr
